Pradyumna Anil Kumar Kubear

+91-7892649235 | pradyumkubeara@gmail.com | linkedin.com/in/pradyum98 | github.com/PradyumnaA |
Bengaluru, India

Education

University of the Pacific — Stockton, CA
M.S. in Computer Science — *May 2024*

Rajarajeswari College of Engineering — Bengaluru, India
B.E. in Computer Science — *Aug 2020*

Experience

Infosys BPM — Bengaluru, India
Systems Engineer — *Jul 2026 – Present*

- Developed 3 full-stack web applications for hospitals by integrating frontend interfaces with scalable backend services like AWS.
- Completed 20 AI-focused courses and earned certifications with an 80
- Built 4 business-oriented LangGraph multi-agent applications that analyze RFPs, company-specific documents, and architecture documents to generate actionable insights.
- Implemented a Request for Proposal project utilizing Python-based packages, namely LangChain and LangGraph, and implemented a full-stack application utilizing Flask, React, and PostgreSQL SQL.

Sai Vidya Institute of Technology — Bengaluru, India
Assistant Professor — *Jan 2026 – Jul 2026*

- Created 5 Educational Videos using Claude and Co Pilot for Data Structures and Algorithms subject.
- Tested the Institutional website using WAVE Extension
- Tutored 30 Business Analytics students on MySQL queries.

Neo Age Services — Houston, TX (Remote)
Mobile Application Developer — *Jul 2025 – Nov 2025*

- Built 5 production-grade cross-platform mobile apps using React Native and TypeScript. Tested 1 web application's usability using WAVE extension with modern state management (Redux/Context).
- Developed 5 Node.js + Express backend services in Typescript, integrating PostgreSQL and MongoDB (Mongoose) for data persistence.
- Designed RESTful APIs consumed by frontends and documented using Postman collections.
- Conducted mobile forensic analysis of Android application artifacts, including application data, system logs, and metadata, to identify suspicious activities and potential digital evidence.
- Applied mobile forensic investigation techniques to examine application behavior, analyze digital traces, and document findings while preserving evidence integrity.

University of the Pacific — Stockton, CA
Teaching Assistant — *Jan 2023 – May 2024*

- Mentored and supported 40+ undergraduate students in Python programming, computer science fundamentals, and object-oriented programming concepts.
- Designed and evaluated programming assignments covering inheritance, polymorphism, networking fundamentals, and clean coding practices.
- Delivered 10+ instructional sessions on object-oriented programming concepts, including inheritance and polymorphism.
- Enforced academic integrity policies and documented or reported honor code violations in accordance with university guidelines.

University of the Pacific — Stockton, CA
Research Assistant — *Jan 2024 – Jun 2025*

- Conducted research on ovarian cancer prediction using supervised learning models, including regression and Random Forest classifiers.
- Generated synthetic datasets using publicly available Kaggle data and Generative Adversarial Network (GAN) techniques to address data imbalance.

Ambience Safety — Bengaluru, India
Mobile Application Developer — *Feb 2022 – Jul 2022*

- Developed 8 mobile applications in React Native using modular UI components and Redux + Context API for efficient state management.
- Implemented OAuth2-based authentication via Google Cloud improving session security and reducing login errors by 40%.

- Integrated CI/CD pipelines for testing using github, PR validation, and automated deployment, improving release consistency and reducing manual overhead.
- Conducted digital forensic analysis of system logs, network traffic, and application artifacts using Wireshark and Linux tools to identify suspicious activities and potential security incidents.
- Implemented forensic data collection and analysis workflows to examine digital evidence, detect anomalous behavior, and support incident investigation while maintaining evidence integrity.

Syslog Technologies Bengaluru, India
Web Developer *Dec 2020 – Dec 2021*

- Developed React-based City Management System with Node.js/Express for municipal reporting and data visualization.
- Managed relational schemas in MySQL and PostgreSQL; implemented REST APIs for data retrieval and reporting.

Projects

Disease Diagnosis with Hospital and Doctor Recommendation System Bengaluru, India
(Indian Patent) *Aug 2019 – Aug 2020*

- Developed full-stack medical portal using React, Node.js/Express, and Python ML models (Random Forest) for multi-label diagnosis tasks.
- Designed PostgreSQL database and stored unstructured ML data via MongoDB for model output persistence.

Technical Skills

Frontend: HTML, CSS, JavaScript, TypeScript, React, React Native, Next.js, Redux, Context API

Backend: Node.js, Express, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: AWS (S3, SageMaker), Firebase

Tools: Git, GitHub, Postman
